Small surrealistic puzzle game with nice visuals, decent atmosphere, very good music and diverse levels. It offers roughly two hours of honest playtime, but for the actual [2016] price of five euro\dollars, it is worth it, just for the vibe. The themes delivered revolve around transcendental issues. The environment reminds artistic, astral-like projections of shattered memories regarding the closest world of the protagonists everyday life. Sometimes it gets pretentious, but if to get over it, it does the job. One more thing - the character movement and controls may feel heavy, but I guess it is part of the plan. Sometimes in a nightmare one would find it hard to move to escape the danger, as if the laws of physics suddenly changed, while **Cubium Dreams** does involve direct horror elements. **I recommend it to the fans of the puzzle genre, as well as people seeking something more dark and atmospheric on STEAM.**

**By the way, Igradelsky, I am begging you, hire a translator next time you try to deliver some philosophical revelations. Because I am looking forward to next release you come up with.. I Think This Game Is Just Awesome And U Should Buy It Right Now!!!. The concept behind Cubium Dreams is not bad and the game actually is quite creepy despite the fact it only are just cubes you are looking at. The real nightmare however, are the controls in this game. They lack complete logic and although it might be done on purpose, it's just no fun trying to handle them. Not to mention the many bugs who seem to be part of this game as well.**

**Again a developer who had a decent concept but either lacks the skills, the time and/or devotion to finish to product. The end result is absolutely not worth 5 euro.. recommended by PurpleTurtle. The dumbest game you will ever play. Not worth anyone's time unless you're looking to waste your time.**

it was not at all fun.. NICE ATMOSPHERE.

Now cons:

1. Try not to place the 'NEW GAME' button so damn close to where the mouse cursor's gonna be when I've clicked "Main Menu". This has cost me nearly XX minutes wasted on 2.
2. Should a player start a new game (in my case unknowingly, as in 1.), he comes back to the first level in a white neat room, but hey, JUST THIS TIME you shall NOT find that 3rd red cube to open the door and move on. Like, EVER.
3. Dev, you are kidding me. Seriously.
4. Will not ask for refund. Nice game.
5. Originally rated NO. Tho love Polar Bears and Vodka.. Dark and simplistic - trip down mkind blow lane. + Awesome Camera angles in intro
  - + Nice attempts on scaring the player
  - + Fun levels
  - Crashed 8/10 times when starting or playing
  - Slow movement, feels awkward
  - Extremely long and boring introtext

This is how I imagine dreams to be like.. 10/10 IGN Rates WtF EZ Goings oNZ. Creepy trippy game (with minor mistakes) but I like it anyway !

I bought it with a coupon so I think it's worth the money :)
