Got the game for \$0.49. Got \$0.49 of fun. A pretty good buy if you want to play couch coop but I bought the game for the online multiplayer which is either broken or dead. Honestly can't justify a thumbs down.. cheap arcade style driving around small maps and shooting waves of enemies. Nothing special and starts to repeat itself after 2nd level already except occasional boss fights which repeat also and are quite lame. LOL at the person who recommended this game because it's "like popping bubblewrap". That is exactly what it's like, except I for one do not consider that a point in its favor. There is no challenge whatsoever; you can just randomly click anywhere and the game practically plays itself. The music is kind of nice I guess but that's about it. If you want a good, casual match-3 game that at least makes an attempt at holding your interest, then 4 Elements, Button Tales, and Heroes of Hellas would all be better choices.. I have tested other "free" driver updaters. Most just lists a few out of date drivers but expect you to pay before the drivers get updated.

Of course, if you have the time, you can go through all your drivers and get legit updates, direct. If you have not got the time or patience, then an automated updater might be worth paying for.

I had decided to go the manual route,until I stumbled on this software.  
I tied it.  
It found 14 out of date drivers and updated them all without asking for a fee.

Nice one Steam :-)

More utilities like this would be much appreciated.  
. gt;Had to awkwardly friendzone some old queer mechanic guy  
>Lost my entire squad  
>Bashed some black kid because he said i was "boring"  
>Got scoulded for not exploding civillians  
>Hated by everyone in the rebellion because i never killed anyone  
>Killed entire rebellion  
>Sat in a bar wondering how I ♥♥♥♥ed everything up  
>Died virgin

10/10. The game is currently broken due a scripting error. To get this fixed you have to e-mail the dev's. I should not have to email anyone or anything for a fix, this should be fixed via updating your game on steam!. This game looks like it could have potential. I like the resemblance to Mace:the Dark Age for the N64 where all the characters have a weapon and are clearly medieval fighters. I'll watch the development of this game and look forward to a completed version. This game has no controller support. I hope controller support is in the next new edition of the game. For only \$5 bucks it might be worth your consideration because when the game goes live it'll probably be \$59.99. I love hack and slash so I might be biased towards my own interests.. Very cool sneaker-type game. The gameplay is very interesting, as you creep ever so slowly. The game really discourages attacking, and you take your time examining all the interesting rooms and characters. Being noticed does not mean insta-death, and generally you creep away from the situation. The game surrounds you with old time arab culture with thematic drawings, in-game lore, and thematic puzzles. Technically, the load times are short, the gameplay is responsive, I had no controller issues, and I had no problems playing on ubuntu linux. I would recommed this to fans of the earliest Thief games.. I've been tried the game,its not easy for normal peoples that didnt know the command of ATC becuase you have to typing by yourself even they've the shortcut but still have to managed so hard as they said its not arcade game it real game,I think the game quite good but I do have to make refund anyway.

Sorry but this one really didn't do it for me.. Really good puzzle game.

The artwork is simple, well-drawn and gives off the right eerie-feel the game has.

The storyline is easy to follow, and interesting. It's creepy all throughout, but still intriguing enough to where it isn't overtly weird. You find out how an elixir affects three-generations of the Vanderboom family.

Some puzzles are a lot harder than others, but it's a short, fun game to waste time on. The bonus puzzles when you finish the initial game are also fun. Rusty Lake: Roots really is a game I don't regret buying, and I'd definitely recommend it.. Alright for the price. Not much replay value after you beat it once with a character.. gud game

it's a little buggy here and there, but it's a great game overall

gud stuff

you should play it

gr8 m8 i r8 8/8 no h8. Really awesome game and really great story line 10 / 10. Awesome little game. Gives you a good work out. Has great graphics, music and love the big guns. A must buy if your into work out type of room scale vr games. I appreciated that when you die, you don't start over from the beginning.
